interests

I am a data lover, knowledge addicted and convinced Europeanist. As a skeptical empiricist, I am trying everyday to make the world better for everyone, keen on figuring out its complexities by proving wrong my previous assumptions. I am certain that political commitment is needed to understand progress implications. I find myself interested in everything, most of all: web, economy, politics, business, entrepreneurship, society, finance, science, data, technology, numbers, models, art, photography, *philosophy*.
